

*In the Claims:*

The following is a clean version of the amended claims, their entry is respectfully requested:

1. A portable speed bump unit for slowing a vehicle, comprising:

a plurality of speed bump cells, each said speed bump cell being a block having a bottom and a top surface, said top surface starting at a front edge of said bottom, rising to a top point above said bottom, and falling to a back edge of said bottom; and

a means for pivotally interconnecting said plurality of speed bump cells, such that each of said plurality of speed bump cells abuts a speed bump cell adjacent thereto thereby creating a longitudinal axis of the portable speed bump unit, and wherein said means for pivotally interconnecting is located between two adjacent speed bump cells and extends in a direction transverse to the longitudinal axis of the portable speed bump unit.
